

DN Runner Interpretations Issued by the Technical Committee

Effective October 1, 2010

E. Runners

3/18/89, amended 10-1-2010 The thickness of the steel plate in insert runners may not be reduced below the minimum thickness of .1875" except as permitted in specification E.12.

10/1/2010 The interpretation dated 4/14/2010 has been clarified in the rewording of specification E9, effective 10/1/2010. **DELETE 4/14/2010** which read: In specification E.9. the last sentence states that it is not allowed to taper or thin the ¼" (6.35mm) thick steel plate runner below the minimum allowed thickness toward the sharpened ice contact edge. Therefore the interpretation dated 1974 that repeats the language of E.9. is removed the interpretations.

10/1/2010 Diagram 19 mm Dimension (attached to be published in Runner Tracks and in the yeabook).
