COMMODORE'S MESSAGE

KENT BAKER US5219
TOLEDO, OHIO, USA

What is it about my soft-water sailing the last several years? I just realized that I avoid sailing after the first weekend of June and before the end of September!

Don't you worry about me over here in Toledo. The water is fine. Well it is fluorescent green, and tastes a little funny, but not to worry. It is actually undergoing some changes that will allow for a lower freezing point. Anybody up for a Thanksgiving Day sail on Maumee Bay?

Thanks to all of you for voting for me as your new IDNIYRA Commodore. I want to do my part and give back to the group that has done so much for me in the past.

MY GOALS ARE SIMPLE: FUN, FAIR, AFFORDABLE, SAFE!

Sounds simple right? Well it should be. But we have challenges. We want to keep our class fair for all and limit changes that could compromise safety or increase costs. Additionally, we continue to discuss race procedure, courses, and rules in the interest of avoiding accidents.

Already the conversations have been interesting. But key to leading our organization is having these discussions to make sure that we are doing the best we can to make DN sailing the best racing experience one can have.

Thanks to newly-elected Vice-Commodore Eric Anderson US5193, Eastern Lakes Rear Commodore, Eben Whitcomb US4775, and their trusted advisers: James "T" Theiler US5224 and Chad Atkins US4487 for all they have done so far in planning for our upcoming Gold Cup and NA's event starting January 25th.

Also thanks and congrats to our newly elected Treasurer, Wes Wilcox US5414, and to Geoff Sobering US5156 for stepping into to the Secretary role. We appreciate and need your experience and skills!

Oh an I would like to give a shout out to newly-appointed Western Rear Commodore Mike Miller US5369, and Canadian Rear Commodore Warren Nethercote! KC3786. Our regional representatives are key to finding us the best ice, organizing personnel, equipment, and accommodations. Glad to have you on the team!

Finally, A big thanks is owed by all of us to our Technical Committee, who has already been called to task on several different issues to make sure our boats are safe and fair. The "T.C." as they are often referred to consists of: Jane Pegel US805, Jeff Kent US3535, Paul Goodwin US46, Tomek Zakrzewski P55, Andreas Bock G624, and Dag Eriksson S74.

From time to time you may see some discussions on our forum at www.dnamerica.org please feel free to join in the discussion to ask for clarifications, or voice your support or concern for issues we have at hand.

Kent Baker

ELECTION & PROPOSAL RESULTS

RESULTS OF THE ELECTION OF THE 2015 IDNIYRA GOVERNING GROUP.

Please welcome aboard the new members of the 2015 IDNIYRA Governing Group, Eric Anderson, and Wes Wilcox.

Commodore
Kent Baker US5219
93 Yea - 0 Nay

Vice Commodore
Eric Anderson US5193
93 Yea - 0 Nay

Secretary
Geoff Sobering US5156
93 Yea - 1 Write-in Lou Lonneke

Treasurer
Wes Wilcox US5414
93 Yea - 0 Nay

RESULTS OF THE PROPOSAL TO CHANGE THE CONSTITUTION OF THE IDNIYRA.

ARTICLE VI - ELECTIONS AND DUTIES OF OFFICERS

A Commodore, Vice Commodore, Secretary, Treasurer, and Past Commodore shall be nominated at the annual meeting. They will be voted for by mail vote. Write-in votes will be accepted. The candidates receiving the greatest number of votes wins the election to that office. The term of office shall be one year: from July 1 to June 30 of the following year or until successors are elected. If an Officer's position becomes vacant before the term of office ends, the person to fill the vacancy shall be elected by the remaining Officers.

Duties are as follows:
Past Commodore: To serve on the Governing Committee, participate

in its deliberations, and vote on decisions. Only members in good standing who have served as an IDNIYRA Commodore are eligible EXCEPT THE RETIRING Commodore, are eligible. This officer serves as an at-large member.

The proposal passed with 77 votes for and 12 against.

A past Commodore will be nominated along with the 2016 governing board at the next regular annual meeting of the IDNIYRA.

On behalf of the members, we thank you for your contribution to the class. The organization had a great turn out for the election and in addition 52 members payed their 2015 dues early! Great job everybody.

Jim McDonagh US5214

PROPOSALS TO THE IDNIYRA BYLAWS & CONSTITUTION

PROPOSAL #1 MODIFY THE LANGUAGE OF IDNIYRA BY-LAWS Modify the language of section B.2.b

B) North American Championship Regatta

1) Management

The regatta shall be under the control of the Governing Committee and managed by the Rear Commodore of the host region in accordance with these By-Laws.

2) Dates

a) When held in conjunction with the Gold Cup, the regatta is held on the day or days remaining after the completion of the Gold Cup. If the minimum number of races has not been completed by sunset of the third day, racing will continue on the remaining days, until the minimum number of races has been completed. If the minimum number of races has not been completed by sunset Saturday, or in view of the weather and/or ice conditions the regatta is abandoned by the Race Committee, the regatta is canceled. On the final day every effort should be made to complete all originally scheduled races.

b) When not held in conjunction with the Gold Cup, the regatta is held during a specific week, beginning on a Monday and ending on Friday, with Saturday as a reserve day. If 3 races in all fleets have not been completed by sundown on Friday, racing shall be continued until sundown on Saturday. The specific week shall be selected by the Governing Committee and the host Rear Commodore.

If the regatta is moved, the Governing Committee may restart the regatta. The regatta is cancelled if the minimum number of races has not been completed by sunset on Saturday, or in view of the weather and/or ice conditions the regatta is abandoned by the Race Committee.

On the final day, every effort should be made to complete all the originally scheduled races.

Submitted by Eric Anderson US 5193

Discussion: Proposal #1 - Change the start date for the NA's to Monday and shorten it by one day.

This proposal was written to insure that the majority of racers attending the NA's can do so with a single week of vacation. When you think about the range of likely locations for a North Americans, they range from salt ice on the LaHave river in Nova Scotia, to Thunder Bay, Ontario, to Mille Lacs in Minnesota, to the coast of New Jersey. With fleets separated by 30 plus hours of driving from the potential race site, this makes it doable for the majority of racers. It does shorten the potential number of race days by 1. By moving the start to Monday and scheduling it for 5 days, a 6th day if needed, that maximizes the potential days of sailing for the number of vacation days as you bridge 2 weekends.

-Eric Anderson US 5193

Winner of the last two World Championships!

The highest performing DN spar in strength and durability.

Unmatched quality in design, process, and choice of materials

Only two known failures in 15 years. A record no other builder can even dream of!

Construction: Computer engineered laminate utilizing glass and carbon pre-preg laid up on a mandrel.

This produces continuous off-axis fibers and perfectly straight uni-directional fibers along the length of the mast.

Spars are autoclave cured at 80 psi to ensure a void-free laminate.

Features: CNC machined aluminum anodized mast step with custom ball bearing mast socket, halyard, multi position lock.

Gibb "T" mast hound with custom spreader bar fitting for shrouds. Available in Complete or Kit form.

Stiffness: Three models available: 3.0 (softest), 4.1, (medium stiffness, the most popular model) and the 5.0 (stiffest)

All models in stock, ready for delivery. Will be available at NA's. Order soon!

CSI DN SPARS 2014

PROPOSALS TO THE IDNIYRA BYLAWS & CONSTITUTION

PROPOSAL #2

MODIFY SECTION 5 TO ALLOW 14 RACES WHEN THE NORTH AMERICANS ARE A STAND ALONE EVENT

5) DN Race System

There shall be seven races scheduled for each fleet and sailed alternately for the Gold Cup and for the North Americans when held in conjunction with the Gold Cup. When not held in conjunction with the Gold Cup, there shall be fourteen races scheduled. Cancellation of races in one fleet shall not affect the races in another fleet. The regatta, as a whole, will be considered a complete event if the Gold Fleet finishes a minimum of three races, regardless of the number of races completed by the other fleets. If the regatta is completed, prizes will be awarded to all fleets that have completed one or more races.

a) The races are scheduled in the following sequence: Mini-qualification races; Gold; Silver; Bronze; Aluminum; Gold; Silver; Bronze; Aluminum, etc. until racing is completed. Each fleet starts no sooner than five minutes after the last yacht of the previous fleet finishes. (See section 7, Mini Qualification Races)

Delays caused by weather or ice conditions may necessitate changes in the above schedule. The host region authority in consultation with the continental class officers present at the regatta has the authority to make changes deemed necessary for safety or to complete the regatta in time. This may include postponing to a later day, canceling non-gold fleets to give time for Gold fleet races and other appropriate measures.

b) Scoring will be done by assigning points in the following manner: first place, 1 point; second place, 2 points; third place, 3 points; fourth place, 4 points; fifth place, 5 points; etc. - lowest score to win. DNS, DSQ, and DNF one worse than the number of yachts in the fleet after the mini-qualification races.

c) Ties will be broken by the following algorithm: If two or more skippers are tied for a position, the skipper who finished ahead of the other in the most races wins the tie. If the tie is not broken, the skipper who finished ahead of the other in the last race wins the tie. If necessary, the next to last race will be used to break the tie. If the tie is still not broken, the next previous race will be compared, and so on in reverse order. If the tie is not broken after all races are compared, it will be declared a tie. Note: All races will be considered in breaking ties (including any throwouts).

d) Throwouts: After 5 races are completed, the points for each yachts poorest race (including DNS, DNF and DSQ) will be eliminated from the scoring. After 12 races are completed, the points for each yachts second poorest race (including DNS, DNF and DSQ) will be eliminated from the scoring, with the exception that, following a hearing, the protest committee may, at its discretion, award a score of DNE to a disqualified yacht that has been found to have dangerously violated NIA Rules Part IV, Sailing Rules, and this race shall not be eliminated from the scoring. Then next-worse score shall be eliminated.

Submitted by Eric Anderson US 5193

Discussion: Proposal #2 -Increase the number of races in the "North Americans only" years to 14

How many races should there be for a NORTH AMERICAN CHAMPIONSHIP?

As far as I am concerned, there should be as many as possible. The current rules make it likely that the NA's will be decided by 4-5 races. This proposal makes it likely that the NA's will be decided by a lot more races. Why not stay a bit longer and race the hell out of it if the conditions are good? Again, looking at the spreadsheet, in the years we hold the GC and NA's we average about 10 races per fleet total. If you take out the second qualifiers which chews up time, it should be possible to get 14 races

off in an ideal NA's year under good conditions. Lets race our butts off when the weather cooperates.

Increase the number of races in the North Americans only years to 14. I had proposed 21 races at last years annual meeting, but a lot of feedback from sailors indicated that 14 was a better number.

In years with poor conditions we will still fight just to get off 3 races in the Gold fleet, but we can counterbalance that with those great years, when we race 14 races and drive home, exhausted, but rejuvenated.

-Eric Anderson US 5193

NUMBER OF GOLD CUP RACES VS. NORTH AMERICAN RACES WHEN GOLD CUP IN NA: 1997-2013

Year	#GC Races	# NA Races	# Total Races	Move?	# EC Races
2013	6	3	9	Yes, 4 miles	6
2011	5	0	5	Yes	13
2009	7	5	12	Yes	
2007	7	6	13		
2005	5	Rescheduled	5		
2003	6	3	9	Yes, short	
2001	3	7	10	No	
1999	6	6	12	No	
1997	5	5	10	No	

Do these 2 proposals increase or decrease costs?

Costs of racing :

- Gas- no difference.
- Hotel Costs: Current situation assume hotel from Thursday through following Sunday- 10 days worst case- 5 days best case. Under the new proposed rules – one less day less overall
- Entry Fee: Not much difference
- Food Costs: Same logic applies as from hotels
- Gear costs: Unaffected

What about the Europeans?

Currently the European championship, when not held in conjunction with the gold cup, has a 21 race format. It sure is nice to have some of the Europeans compete at the NA's. I believe that the potential to get more racing in at the NA's would encourage more participation from the European sailors. I realize the Europeans are not our primary concern for the NA's but a batch of them do come here to sail.

-Eric Anderson US 5193

PROPOSAL #3
CHANGE LANGUAGE OF IDNIYRA
CONSTITUTION:
ARTICLE VI - ELECTIONS AND DUTIES OF
OFFICERS

First sentence to read: "A Commodore, Vice Commodore, Secretary, Treasurer, Past Commodore, and **Information Technology Officer** shall be nominated at the annual meeting."

Add to section "Duties are as follows:"

Information Technology Officer:

- 1) Manage and maintain the association's electronic record-keeping systems.
- 2) Manage the association's Internet sites and other technological tools.
- 3) Advise the executive committee on emerging technologies and their uses by the association.
- 4) Collaborate with the European Webmaster.

Submitted by Geoff Sobering US 5156

Justification:

The association is increasingly reliant on electronic records, internet sites, and other technological tools. The role of the ITO is to manage and coordinate those systems. The European IDNIYRA has long recognized the importance of this role in their "Webmaster". It would be desirable to have a North American counterpart.

-Geoff Sobering US 5156

PROPOSAL #4:
CHANGE THE SECTION OF THE BY LAWS
THAT PERTAINS TO RACING RULES
FOR MORE FLEXIBILITY

Racing Rules

The Racing Rules of the National Iceboat Authority shall prevail, available from N.I.A., P.O. Box 40, Williams Bay, WI 53191, \$1.00, supplemented by the following Association rules:

A) Failure to use the parking brake at any time that the yacht is left unattended with sail up, may result in disqualification for the entire regatta if damage or injury results and the Race Committee deems it appropriate.

B) While racing, each sailor must wear a helmet that they determine adequately protects them from the hazards of the sport. As a minimum, the helmet will be hard-surfaced, energy-absorbing crushable foam-lined, 3/4 head and cover the ears. This minimum helmet standard has not been shown to provide adequate protection from the hazards of the sport in all circumstances. Interpretations of this rule may be made by the Governing Committee.

C) All races shall be a minimum of four (4) miles in length. (6 1/2 km)

D) Lap time limit shall be 6 1/2 minutes per mile (1 mile between marks = 13 minute lap time limit). (see N.I.A. Rules, Part II, par. G.)

E) No race may be started after 1/2 hour before official sunset. This time may be increased at the discretion of the Regatta Chairman and his advisors.

F) The same equipment (except runners and sails) must be used throughout the entire regatta, except articles found illegal in one race or heat.

G) Official sunset time shall be posted at the skipper's registration area at the time of registration.

H) No boat shall be expected to start any race (Championship/Gold fleet or Class B/Silver Fleet) earlier than fifteen (15) minutes after the last boat finished the race in which the boat competed.

I) No electronic equipment is allowed, except timing device.

J) The first yacht finishes her race after completing the scheduled number of laps. Any following yacht finishes the race when she crosses the Finish Line after the finish of the first yacht. In each race, a yacht will be scored ahead of all yachts with fewer laps. Any yacht not finishing within 20 minutes of the first yacht will be scored according to her finish in the previous lap (if no laps have been completed she will be scored DNF).

K) The IDNIYRA governing committee may further modify the racing rules. Any modifications must be published in the Sailing Instructions and course diagram if applicable

Submitted by Eric Anderson US 5193.

Discussion.

This proposal is designed to give the class more flexibility in Regatta Management. Currently the only usable course diagram is the one in the NIA rules, and there is no provision to use a notice of race (NOR) or Sailing Instructions (SI) to modify any aspect of regatta management, that is regulated by the NIA.

SAME AS IT EVER WAS THE STATE OF DN RACING

HONORING THE RACING RULES

Jane Pegel US805 explains the proper application of the rules and the appropriate boat handling for a couple of the most common situations.

Originally printed in Runner Tracks in 1986

Photo: gretcendorian.com
2011 Gold Cup, Peru, IL

By Jane Pegel US805
April 1986

I'm pleased to make public the fact that I'm completing my 31st season of DN racing. My first DN was #305. This number still remains in the family and is registered to my husband Bob. I race under DN 805 and my daughter, Susie, races under DN 905. I have a record of all official class publications dating back to 1956, and I'm the only person whose name appears in the race results of that vintage who is still racing DNs. With any luck I'll be racing hard for a good many more years, in fact Bob is going to build me a new hull.

The point is I've seen a lot of sailors and boats come and go. The Class has weathered good seasons and bad and experienced some growing pains. The 1986 North Americans was not the largest ever held, but I think the level of racing was perhaps the best we've had. Seldom have we seen the champion come away without winning a race. What does this mean? I think it indicates that a lot of sailors have learned how to set up their rigs, align and sharpen their runners, and sharpen their sailing skills to a level required by the world's most competitive iceboat racing class.

Through the ingenuity of its sailors, most of whom build their own boats, the DN has evolved into a boat that is faster, lighter, stronger, easier to sail, and more fun to sail than it was when I started in the class. Original DNs hiked a lot, were heavy to carry, and broke down. These factors made them hard to sail. In fact, I bet that I'd be hard pressed to physically handle one of those boats and race it hard all day. I'm thankful the rules for the class have enabled

it to become such a fine boat to sail and that these rules have encouraged innovative sailors to join the class, for they're fun to race against.

Ultimately, I guess it's the people in the DN class that have made it so much fun. Sure, we sometimes have disagreements concerning the proper approach to governing the class, but we are unanimous that DN racing is a "high".

HONORING RACING RULES

As with sailboat racing, one of the things that makes iceboat racing so satisfying is the "Honor Code" that is required on the race course in order to make the game a fair one. The officials do not blow a whistle, stop the action, deal out a penalty, and award a bonus tack to the fouled boat. The sailors police themselves, give way to the right-of-way boat, and when an honest error in judgment is made, justice is served through the protest procedure.

To the credit of the racers at the [1986] North Americans, there were no serious collisions. But there were a number of fouls. A few of these were carefully resolved by the protest committee, and one sailor voluntarily acknowledged his error and withdrew from a race. In these few instances the game was fairly played. Unfortunately, these instances were outnumbered by foul situations that were not fairly resolved. In conversations following the racing, many of the sailors expressed the opinion that not everyone is fully aware of his responsibility in various close quarter racing situations. I have been asked to explain the proper application of the rules and the appropriate boat handling for a couple of the most common situations:

PORT AND STARBOARD TACK

"When two yachts are sailing **on-the-wind**, the yacht on the **port tack** shall keep clear" of the yacht on the **STARBOARD TACK**. "When two yachts are sailing **OFF-THE-WIND**, the yacht on the **PORT TACK** shall keep clear of the yacht on the **STARBOARD TACK**." When boats to which the above rule applies are converging, it is the responsibility of the boat on the port tack to give way to the boat on the starboard tack. However, **BOTH BOATS** are obligated to prevent a collision, so if the starboard tack boat believes that the port tack boat is not going to give way, then the starboard tack boat is entitled, indeed is obligated, to take evasive action.

In a port-starboard situation, the proper steps to comply with the rules are as follows.

1. The port tack boat should let the starboard tack boat know she sees her. The helmsman of the port tack boat should markedly turn his head toward the starboard tack boat, signal with his hand or perhaps by nodding his head, so the starboard tack boat is assured the port tacker sees her.
2. The port tack boat should alter her course (tack, jibe, bear away, or freshen, as is appropriate) **A COMFORTABLE DISTANCE FROM THE STARBOARD TACK BOAT**.
3. If the port tack boat does not take evasive action, then the starboard tack boat should tack, jibe, bear away, or freshen, as is appropriate. Because evasive action taken by the starboard

tack boat is usually at the last possible moment, she should maneuver in a direction that will reduce the closing speeds of the two boats so if a collision does occur at least damage will be minimal. For example: Port and starboard boats sailing on-the-wind are converging. Only these two boats are in the area. The port tack boat takes no evasive action. The starboard tack skipper estimates he'll hit the port tack boat at the mast. The starboard tack boat should head up, ease sail, and even may tack. This action will slow the starboard boat and put her motion more parallel with the port tacker. If the starboard boat bears away to go behind the port tacker, the chances of a harder, and perhaps head-on collision are more likely.

NOTE: This evasive action of the starboard tack boat is not a Violation of the rule: "a right-of-way yacht shall not alter her course so as to mislead or prevent a non-right-of-way yacht from keeping clear." In the above example, the non-right-of-way yacht had not taken any "evasive action" and Fair Sailing requiring common sense, safety and good sportsmanship required the starboard tack boat to alter course. If the port tack boat had begun to lay off to go behind the starboard tack boat, and then the starboard tack boat had altered course so the port tack boat could not avoid her, the burden would be on the starboard tack boat.

THIS SELDOM OCCURS.

LEEWARD MARK ROUNDINGS

The primary difference between sailboat rules and iceboat rules is in those that apply when sailing off-the-wind and when rounding the leeward mark.

The iceboat rules are designed to make it as safe as possible to get around the leeward mark without running into another boat.

The highest speeds are attained when sailing off-the-wind. The most difficult maneuver in racing is making a good turn at the leeward mark. The convergence of multiple boats complicates the maneuver. The rules are designed so the same boat has right-of-way while rounding the mark that had the right-of-way all the way down the leg. Think about it this way:

1. Marks are rounded to port.
2. Boats are on the port tack as they round the mark.
3. As the boats make their approach to the mark and are close enough to each other so that there might be a collision, the rules provide the boat that is inside of the other has right-of-way, even 100 yards from the mark. For example:

A) If two boats are side-by-side and on port tack sailing off-the-wind, the windward boat has right-of-way. Because the windward boat already has right-of-way, there is no transfer of responsibilities as the two boats get closer to the mark, the windward boat is inside, and must be given room to round the mark.

B) If two boats are approaching the leeward mark on opposite tacks, the starboard tack boat has right-of-way. The port tack

boat must bear off to leeward to honor the starboard boat. In bearing off, the port tacker automatically gives the starboard boat room to jibe inside and to windward of the port tacker, which then puts them in the same relative position as the two boats in example 3a. Of course, the starboard tacker has the option of actually forcing the port tacker to jibe onto starboard tack too.

The danger of a collision, and a foul, exists when boats are side-by-side (as in 3-A) or aiming at each other (as in 3-B). A collision may also exist when a faster moving boat approaches from the rear. Whether approaching a mark, or out in the middle of the course, a boat coming up from behind cannot run into the boat ahead. If the boat ahead is moving at the same speed, the chasing boat can't catch her to hit her, so there isn't a problem. In the final approach to the mark, the faster moving boat approaching from the rear must not pull alongside on the inside if the boat that was ahead has started her rounding maneuver.

EVERYONE MUST CONSIDER THE POINT WHERE THE ROUNDING MANEUVER BEGINS IS INFLUENCED BY THE WIND AND ICE AND ALL OTHER BOATS IN THE AREA. Because the speeds of the boater involved may be very much different (one guy might be pushing, another guy in a screaming hike), common sense and safety **ARE SUPREME.** There is not a specified number of boat lengths, as in sailboat racing, to tell us where the rounding maneuver begins.

DN TECH

OFFICIAL INTERPRETATION OF THE DN SPECIFICATIONS
SUBMITTED BY IDNIYRA TECHNICAL COMMITTEE CHAIR JANE PEGEL US805

**CORRECTION TO
IDNIYRA RUNNER SPECIFICATION E. 9
OCTOBER 1, 2014**

Prepared for Runner Tracks by Jane Pegel, Chairman IDNIYA Technical Committee

It has been brought to the attention of the IDNIYRA Governing Committee and Technical Committee that there exists an error in the wording in the third sentence of runner specification E. 9. as it appears in the yearbooks dated 2011, 2012, 2013, and 2014.

Appearing below, the third sentence in E.9. has been corrected to require the leading edge to be rounded to an edge radius of not less than 1/16" (1.6 mm).

E. Runners

9. The leading edge of the runner steel is that portion of the edge forward of the sharpened ice contact edge and higher than 3/4" (19 mm) above the ice, measured with the runner in normal sailing position. The sharpened ice contact edge of the runner steel is along the entire bottom edge and extends forward and upward along the edge of the steel to a point not exceeding 3/4" (19 mm) above the ice, measured with the runner in normal sailing position. The leading edge must be rounded to an edge radius of not less than 1/16" (1.6 mm) and shall be faired to the sides of the steel as allowed in E.12. The sharpened ice contact edge may be rounded or sharpened to an included angle of not less than 75 degrees. The camber (crown) and shape of the sharpened ice contact edge is optional. Along the sharpened ice contact edge, the rounded edge or the sharpened angle is allowed to be faired to the sides of the steel providing the thickness of the steel of plate, insert style or T runners is not reduced below the allowed minimum. (ref. E.1.a., E.2.f., E.2.h).

GREETINGS FROM CONNECTICUT

Fellow Iceboaters,
I hope this letter finds you in good health, ankle deep in woodshavings and carbon dust. For those of you who don't know me, I am from Connecticut and normally sail with the New England Ice Yacht Association. I am looking forward to working for the DN class and supporting the Commodore (Kent Baker).

If anyone wants to get in touch with me, my email is eric.anderson5193@att.net and my phone number is (860) 367-7806. Plans are well underway in the East to host the 2015 DN Gold Cup and North Americans. I urge you all to attend, as they are awesome events. If you have not been to a Gold Cup before, you are in for a treat. The great thing

about this sport is that there is competition, and camaraderie at all levels, from Big Mushamush Lake in Nova Scotia to Lake Pepin in Minnesota, and Thunder Bay Ontario to Toms River in NJ.

Sail Fast,

Eric Anderson US5193
IDNIYRA Vice Commodore

NOTICE OF RACE

2015 WORLD & DN NORTH AMERICAN CHAMPIONSHIPS

Notice of Race
World and North American DN Championships 2015
January 24 – 31, 2015
(Racing days – Sunday, January 25, 2015 until Saturday, January 31, 2015)

Organizing Authority: International DN Ice Yacht Racing Association
 Hosts: North American Eastern Region, Mountain Lakes Region, Canada

Dear Friends,
 On behalf of the International DN Ice Yacht Racing Association and the North American Eastern Region, all ice boaters are invited to compete for the World and North American Championship 2015 titles.

1. Rules:

All races will be governed by the Racing Rules of the National Iceboat Authority; except as modified by the By-Laws of the IDNIYRA as stated in the sections pertaining to, IDNIYRA Regattas, Racing Rules, and Official Specifications of the DN Ice Yacht; the Notice of Race, including any amendments to the Notice of Race, (except as any of these are altered by the sailing instructions) and the Sailing Instructions. The Sailing Instructions can be modified at the Skippers Meeting and by a notice posted on the official notice board.

2. Eligibility:

All DN class yachts meeting the requirements of the Official Specifications and whose skippers meet the requirements of the By-Laws of the IDNIYRA as stated in the section IDNIYRA Regattas are eligible to enter and race in the championship.

3. Site Information:

- A. The primary site is the North American Eastern Region.
- B. Site and Headquarters Information will be available on the Official Regatta Hotline: 508-377-6100 (Ext. 8), beginning January 18, 2015.
- C. Site and Headquarters Information will be available on the IDNIYRA website <https://ice.idniyra.org>, on and the NEIYA website <http://www.theneiya.org>. In the case of conflict, the IDNIYRA website will take precedent.

4. Entry, Deadline, and Fee:

- A. Online Registration is the preferred method of entry. Registration can be accomplished online at the IDNIYRA website: <http://www.idniyra.org>. A registration form for each Regatta can be downloaded from the IDNIYRA website or found in the Fall 2014 Runner Tracks.
- B. World Championship Regatta: The early entry fee is \$100 USD, if paid by PayPal or postmarked by December 31, 2014. The late entry fee is \$150 USD, if paid by PayPal or received January 1, 2015 or later. Entrants traveling from Europe are exempt from paying late fees.
- C. North American Championship Regatta: The early entry fee is \$90 USD, if paid by PayPal or post-marked by December 31, 2014. The late entry fee is \$135 USD, if paid by PayPal or received January 1, 2015 or later. Entrants traveling from Europe are exempt from paying late fees.

5. Schedule of Events:

Date	Event
December 31, 2014	Deadline for early entry fee
January 1, 2015	Late entry fee goes into effect.
January 18, 2015	Initial posting of Site information
January 24, 2015	Opening Ceremony at the Race Headquarters starts at 5PM. Registration to follow from 6PM – 9PM at the headquarters.
January 25, 2015	Skippers meeting at 9AM at the launch site.
January 25, 2015	First Race at 10:15AM.

The North American Championship Regatta to start after the conclusion of the World Cup Regatta.

For other events and all possible changes, see the Sailing Instructions. Please check the Official Notice Board and/or the announcements at the daily skippers meeting.

- 6. **Sailing Instructions** will be available at the final registration and check-in.
- 7. Yachts with two piece masts or stick masts shall notify the measurement committee prior to the close of registration to have mast approved and officially sealed prior to the first race for the duration of the regatta.
- 8. Prizes shall be awarded in accordance with the IDNIYRA by-laws.

Think Ice!

Eben Whitcomb
Eastern Region Commodore

IDNIYRA WORLD CHAMPIONSHIP ENTRY FORM

SHOW TIME

OBSERVATIONS ON ICE SAILING REGATTAS AROUND THE WORLD
BY DEB WHITEHORSE

HOW EUROPE RUNS THE SHOW
AND WHY WE SHOULD CARE

I had a close up look at the International part of the International DN Ice Yacht Racing Association while at the 2014 Worlds on the Baltic Sea in Haapsalu, Estonia. DN Europe PRO Stan Macur was kind enough to let me and Mercedes Auger (who volunteers as a scorer at many North American regattas) observe his team of 12, all from Poland, who've been working together for so long that they don't need to talk much (which was helpful for me because I don't speak Polish). Team members knew their tasks and operated like a well juiced runner sharpening stone.

When the Gold Cup (GC) is in Europe, regatta fees are higher than in North America. Higher fees pay for the privilege of a Professional Race Committee (PRC). IDNIYRA Europe believes that the investment in a PRC improves regatta quality leaving competitors, including officers, free from the stress managing a race course.

I rarely saw DN Europe Commodore Joerg Bohn talking with Stan Macur while on the ice at the 2014 GC in Estonia.

European GC and European Championship (EC) regattas attract more competitors than in North America. Regatta attendance in North America is a complex issue and I'm not suggesting by any means that a North American PRC would solve the problem. We should be proud of the fact that North American regattas are organized and run with less personnel, a different set of volunteers each year, and when Mother Nature cooperates, just as many races during a day.

DN Europe's officers realized that some of the newer sailors with traditional sailing backgrounds didn't understand the differences between soft and hard water racing rules.

At check in for the 2014 Gold Cup, competitors were shown two simple graphics (with potentially 18 different languages spoken, graphic simplicity was important). Skippers were asked to choose which boat had right of way in an upwind/downwind situation (Rule 2) and which boat, both downwind on starboard tack had right of way (Rule 4). The European officers were dismayed by the number of skippers who didn't know basic rules. The upwind boat ALWAYS has right of way on a race course regardless of the tack and that downwind both on starboard tack, the windward yacht has rights,

At the 2015 European Championship, a new system will be instituted whereby competitors must pass a rules test at registration to participate in the regatta. The test is available for study on the website, icesailing.org. Competitors will be given two opportunities to pass the test at registration and if they fail, that skipper will not be allowed to race in the regatta. North American skippers who plan to race in the 2016 Gold Cup had better be ready to pass this test.

Every morning began with a 9AM skippers' meeting at the launch site where Stan relayed information about the racing area. Even though he hadn't been out to the course, Stan knew precisely what conditions awaited us because of

three men, known as the Technical Committee (TC), who scouted the ice at 7 AM each morning. Because we were on a bay of quickly changeable sea ice, it was peace of mind for me knowing that the long ride on the RC ATV to the course would be as safe as the day before.

Scouting ice early each morning is one of the most important behind the scenes activity that should be done to run a successful regatta so that the PRO isn't left scrambling for options shortly before racing is supposed to begin.

I've seen this in action here, most recently at the 2014 North American Championship when Bob Dill and PRO Bob Schumacher scouted Lake Champlain in Plattsburgh early each morning. Ice scouting followed by a skippers' meeting should be common practice for all regattas. The key in both instances is communication, the scouts communicating to the PRO, and the PRO communicating to the skippers.

The TC was responsible for setting the course, pits, and reacting to wind changes. The TC head was constantly checking the squareness of the course throughout the day. Though Stan was aware of the wind, he didn't have to focus upon it as much knowing that his TC's first concern was wind shifts and the course. The TC takes some of the pressure off the PRO. I've seen more than a few North American PROs in different classes battle through course changes with less help than Stan had at his disposal.

Like the rookie hire on a road construction crew, one of my jobs in Estonia was to hold a blue warning flag while the starting line was being unspooled. I hovered near the middle of the line which alerted skippers to keep clear because the starting line was being set. At the end of the regatta, Stan said one of the biggest accomplishments was the starting line remained intact. I've witnessed some frustrated race committees trying to deal with skippers who aren't paying attention to the line. If there's enough help, stationing someone at the middle of the line on the even and odd sides with a flag as it's being set or changed could help with that frustration. If skippers understand that when they see race committee personnel with a flag, it means keep away, the line is being set or changed.

The Polish scoring team used an old red school desk tricked out with runners and a Plexiglas windshield which protected papers from the wind. After the fleet started, the scorers moved

the desk into position, two sat on a bench and wrote, while Dorata, a well known sailing judge in Europe, stood on skates and called sail numbers in Polish. When the scoring was completed, another skater quickly whisked list of finishing positions to the bulletin board.

Starting in 2015, the scorers at the EC will remain near the starting line during the first two laps and then walk out to the finish line for only the final lap. This method is similar to my own experience for scoring 4LIYC racing, International Skeeter Association and Northwest regattas.

During the 2014 European Secretary's meeting in Riga, I learned that DN Europe will institute this method because of an incident where a scorer was hit by a DN at another regatta. It's interesting to note that the skipper who hit the scorer couldn't see him because he was wearing all black (*hey-that's what I wear!*) and was standing too far upwind of the leeward mark. All DN Europe PRC members wear fluorescent vests, something that should be practiced here as well. In the future, scorers will stand slightly downwind of the leeward mark rather than at a 90 degree angle, making the leeward mark the fa-

vored end of the finish line and keeping competitors at a safer distance from the scorers.

The course layout in Europe is similar to my own club's in that neither uses the finish gate system (also known as safety zone). Rather than sail straight downwind through the finish gate, skippers continue around the leeward mark and then sail around the odd numbered side of the course, all the way to the end of the starting line. Sailing is not permitted in the pits.

In my opinion, this method saves time with course changes and more importantly, allows the next fleet to be lined up ready to race.

Skippers push their boats to the starting line only when they see their fleet flag raised. The absence of a fleet flag indicates a change in course is likely and skippers are not to come to the starting line.

Iceboat racing is at the mercy of the weather and time is of the essence. Stan's goal of running 3 races per hour was easily achieved with the help of a disciplined fleet of skippers who immediately came to the line when called. Both the 2014 GC and EC regattas were completed within the week with the maximum number of races for all fleets. Running races safely and efficiently with consistency leaves racers to focus on their luck, gear, and set up—rather than the race committee.

Unless someone can be assigned to police the finish gate area, unknowing spectators can create a dangerous situation. Several years ago, my brother, who was finishing a Skeeter race on Lake Geneva, narrowly avoided a kid who was goofing around on an ATV in the safety zone. At the 2013 ISA, a photographer walked through the zone as a race finished. Someone yelled "freeze", she did, and thankfully the

TRAFFIC CONTROL MARKS, ALSO KNOWN AS "DARLING MARKS" (SO NAMED FOR NEW JERSEY ICEBOATER JOHN DARLING) ARE USED IN EUROPE BUT NOT IN NORTH AMERICAN DN REGATTAS. NEIYA COMMODORE JAMES "T" THEILER US5224, WHO HAS COMPETED IN EUROPE, OFFERS HIS OPINION:

"LOVE using Darling marks; One small mark is placed about 150 meters yards dead downwind from the weather mark and one the same distance upwind from the leeward mark. Both are left to port along with the main marks.

Darling marks help to sort congestion at crowded roundings by allowing more time for boats to figure out where to find their place in the procession when the layline is crowded. The best case in point being the first windward mark; the darling mark creates a zone where boats coming in on port can make a fast or slow tack and allows a little more time for them to pick a safe spot in the crowd before they all get to the mark. A Darling mark also discourages boats from gybing onto port immediately after rounding and heading down the starboard layline toward oncoming boats still going upwind on starboard tack.

The same idea applies at the bottom mark, only the other way around.

I feel that they add a significant safety factor to racing, especially where fleets are large and the fleet is tight, making for crowded mark roundings.

We generally do not use them here in North America and I think we should for A) Safety, and B) To be consistent with how things are done in Europe. In Sweden I gave everyone watching the race a good laugh when I tacked to clear my air immediately after rounding the bottom mark, forgot about the darling mark, and had to tack again and reach down to it a few seconds later. I made a mental note to avoid that mistake in the future and using Darling marks over here would be a good step in that direction for all of us.

James "T" Thieler DN US 5224

ESTONIA GOLD CUP

2014 GOLD CUP & EUROPEAN CHAMPION
Karol Jablonski P36 of Poland won his 8th Gold Cup championship in 2014. Photo by Ron Sherry.

DO YOU KNOW THIS GUY?

You should! His name is the first one engraved on the Gold Cup. It's Ain Vilde of Estonia (left) with Ron Sherry. Ain won the inaugural Gold Cup World Championship trophy on Gull Lake in Michigan back in 1973.

boats missed her as they sailed closely past.

Skippers who set up on the far side of the safety zone are placed in danger when they have to walk through the safety zone often when boats are finishing, to check the notice board for information and starting positions. A no sail zone between the starting line and pits is a better option for safety for DN races in my opinion. This way people walk their boats to the starting line and are safe from sailors reaching down the line to get to their starting position. A no sail zone also keeps sailors who are walking their boats to the line safe from people who are sailing out to tune their boats.

A DN Europe practice that would be of benefit to DN North America is a "Lessons Learned" discussion after the regatta with the PRO and officers by conference call or electronically.

Our dedicated, hardworking North American volunteers often make heroic efforts to get to a regatta and then endure what ever weather is thrown at them. They can achieve anything with good leadership.

It's hard to find another sport in the world where the participants are so passionate about it that they willingly travel long distances to see friends and race. Whether running the races or racing, safety and efficiency are the common goals on every ice sailing course in the world, from Lake Christina in western Minnesota to Lake Baikal in Siberia. It's been a privilege for me to see how things are done on both sides of the ocean. Through good communication we can make things better on both sides. Let's continue to learn from each other.

by: **Deb Whitehorse**

2015 IDNIYRA RANKING LIST

BY RANK

Compiled by Loretta Rehe

JOIN THE CLUB

The IDNIYRA is the major player in the sport of ice boat racing representing hundreds sailors in 20 countries and organizing regattas worldwide.

We are the main source of information for everything DN iceboats. Whether you're a serious racer who chases ice around the world or a passionate cruising ice boater on a an inland lake, we would love for you to join our family.

Please consider joining or renewing your IDNIYRA membership today.

For only \$25 USD per year you will help to support and promote the most thrilling sport on the planet and receive all the necessary resources to race.

Every member will have free access to web based version of our publication, Runner Tracks.
